

IBM x CAIR Watsonx Hackathon

Judge Scoresheet · May 29–31, 2026

Judge Name: _____

Team Name #: _____

Category	What We're Looking For	Max	Score	Notes / Observations
1. Problem & Relevance	Clear real-world problem in Ocean / Defense / Energy / Mining / Manufacturing; NL context evident. The problem should be specific enough that a decision-maker in the industry would recognize it.	10		
2. Innovation	Novel or creative use of IBM Watsonx; fresh angle beyond a standard demo. Bonus if the framing or approach is something judges wouldn't have anticipated.	10		
3. Technical Execution	Meaningful Watsonx integration; working proof-of-concept; coherent architecture. At least one Watsonx service should be genuinely used, not just mentioned.	10		
4. Video & Communication	Clear storytelling; understandable to both technical and business judges. The narrative follow: problem → solution → demo → impact.	10		
5. Impact & Value	Quantified or well-reasoned business / social impact; believable path to real-world use. Think: would a real stakeholder fund or deploy this?	10		
TOTAL SCORE		50	/ 50	

Scoring Scale:

9–10 Excellent	7–8 Good	5–6 Adequate	0–4 Needs Work
